List of Intercepted Plant Pests, 1973-1977

Plant Importation & Technical Support Staff
Technical Information Unit

INTRODUCTION

This, the 60th annual report of pests and pathogens found in agricultural quarantine inspections, is the 5th such publication to be assembled and printed from computerized interception records. It summarizes records of significant living plant pests and pathogens found in, on, or with plants, plant products, carriers and container vans, imported or entering into the continental United States and Hawaii or the offshore possessions, or moving between these areas.

Accumulated totals for organisms are listed under headings indicating either that the intended use of the contaminated host is consumption or propagation, or that the item is not intended for importation and is designated as non-entry.

Incompletely identified organisms belonging to economic pest groups are included in the listings when they are not taxonomically separable to the degree required for a comprehensive pest risk assessment.

For this issue only, information is assembled in three parts covering fiscal years 1973-77. In section I, insects, mites, mollusks, pathogens, and nematodes are tabulated separately for fiscal years 1973-75. Wood-infesting insects are listed apart from the other insects in this section to illustrate the complexity and magnitude of this quarantine problem. Sections II and III are compilations of quarantine significant organisms intercepted during fiscal years 1976 and 1977, respectively. The 12-month fiscal year period comprising each year's interception records changed in 1976 from July 1 through June 30 to October 1 through September 30. The 1976 fiscal year report covers a 15-month period to accommodate this change. A nematode listing does not appear in the 1976 report and the 1977 listing is incomplete. Missing records will appear in future issues of the publication.

The lists were made from identification records received during fiscal years 1973-77. Insect and mite identifications are made by personnel of the Plant Protection and Quarantine Programs (PPQ), (Animal and Plant Health Inspection Service (APHIS)), the Insect Identification and Beneficial Insect Introduction Institute (IIBIII), (Federal Research, Science and Education Administration (FR, SEA)), and the U.S. National Museum.

Scientific names of listed organisms were reviewed by scientists of PPQ and IIBIII. Scientific and common names of host plants were verified using Hortus III, Standardized Plant Names and other botanical resources.

PEST ORIGINS

Countries of origin shown for pest interceptions are obtained from the best available sources at the time of interception. Though not meant to be definitive, every effort is made to insure the accuracy of this information.

Insects

Acanthomytilus vermiformis (Takahashi) (Diaspididae) -- (=Takahashiella vermiformis (Takahashi) (Diaspididae))
Acanthoscelides argilloceus (Sharp) (Bruchidae) ----- (=Acanthoscelides armitagei (Pic) (Bruchidae))
Alagasa virgata (Harold) (Chrysomelidae) ----- (=Oedionychus virgatus Harold (Chrysomelidae))
Athalia rosae (Linnaeus) (Tenthredinidae) ----- (=Athalia colibri (Christ) (Tenthredinidae))
Ceratotherips ericae (Haliday) (Thripidae) ----- (=Taeniothrips ericae (Haliday) (Thripidae))
Dactylotrypes longicollis Wollaston (Scolytidae) ----- (=Dactylotrypes uytenboogaarti Eggers (Scolytidae))
Epichloristodes acerbellia (Walker) (Tortricidae) ----- (=Epichlorista ionephela (Meyrick) (Tortricidae))
Frankliniella intonsa (Trybom) (Thripidae) ----- (=Frankliniella formosae Moulton (Thripidae))
Frankliniella schultzei (Trybom) (Thripidae) ----- (=Frankliniella paucispinosa Moulton (Thripidae))
Lichtensia viburni Signoret (Coccidae) ----- (=Fillippia viburni (Signoret) (Coccidae))
Macchiademus diplopterus (Distant) (Lygaeidae) ----- (=Blissus diplopterus (Distant) (Lygaeidae))
Macchiademus diplopterus (Distant) (Lygaeidae) ----- (=Ischnodemus diplopterus (Distant) (Lygaeidae))
Medythia suturalis (Motschulsky) (Chrysomelidae) ----- (=Paraluperodes suturalis (Motschulsky) (Chrysomelidae))
Megalurothrips distalis (Karny) (Thripidae) ----- (=Taeniothrips distalis Karny (Thripidae))
Megalurothrips kellyanus (Bagnall) (Thripidae) ----- (=Taeniothrips kellyanus (Bagnall) (Thripidae))
Megazopherus chilensis (Gray) (Tenebrionidae) ----- (=Zopherus chilensis Gray (Tenebrionidae))
Mycterotherips consociatus (Targioni-Tozzetti) ----- (=Rhopalandrothrips consociatus (Targioni-Tozzetti) (Thripidae))
Mycterotherips latus (Bagnall) (Thripidae) ----- (=Taeniothrips latus (Bagnall) (Thripidae))
Mytiopardalis pardalina (Bigot) (Tephritidae) ----- (=Garmomyia pardalina Bigot (Tephritidae))
Sipalinus gigas (Fabricius) (Curculionidae) ----- (=Sipalinus hypocrita (Boheman) (Curculionidae))
Strophingia ericae (Curtis) (Psyllidae) ----- (=Rhinocola ericae (Curtis) (Psyllidae))
Thrips hawaiiensis (Morgan) (Thripidae) ----- (=Taeniothrips hawaiiensis (Morgan) (Thripidae))
Thrips obscuratus (J.C. Crawford) (Thripidae) ----- (=Isothrips obscuratus (J.C. Crawford) (Thripidae))
Thrips orientalis (Bagnall) (Thripidae) ----- (=Isothrips orientalis (Bagnall) (Thripidae))

Nematodes

Globodera rostochiensis (Wollenweber) Mulvey & Stone -- (=Heterodera rostochiensis (Wollenweber))
Punctodera punctata (Thorne) Mulvey & Stone ----- (=Heterodera punctata (Thorne))

Diseases

Puccinia tillandsiae Cumms. & Pollack

(=Uromyces tillandsiae Cumms.)
